## **Career Objectives:**

I want to continually grow as a web developer, gain more experience and learn new things. My intention is to continually apply my creative abilities to push boundaries and to never settle for broken conventional norms. I believe in consistent web standards, continual progression, open source software, knowledge sharing, teamwork, and collaboration.

---

## **Summary of Skills:**

**I have very strong skills in:**

JavaScript/HTML5, CSS, JQuery, Java, responsive web design, SQL, PHP, Database design, general computer dorkiness, mobile web apps

**I have a working knowledge of:**

Java persistence API, Object Oriented Programing, Bash, Git, Native app development

**I would love to become more familiar with:**

Node.js, web design, Backbone.js, Angular.js, Ruby, Python

---

## Work Experience

---

### Canadian Tire Innovations Lab (coop)

March 2013 to September 2013

**Description:** CTi is an innovations lab set up in Communitel with the goal of infecting Canadian Tire with a new innovative process of project management through short term prototyping in a start-up environment.

**Responsibilities:** Designing projects from scratch, working through use cases and interface design, database design and implementation, back end and front end design and development, project follow-up, in an extremely team oriented environment

**Technologies:** JQuery, HTML5/JavaScript, CSS, JQuery mobile, PHP, Java Persistence API, MySQL, Git, Phonegap

**Use of time:** 30% project planning, 50% and coding development, 20% technology research

---

### Fastenal Co

January 2012 to September 2012

**Title:** Warehouse Employee

**Description:** One of Canada's biggest distributing company for fasteners and other assorted mechanical items.

**Responsibilities:** Worked mostly individually performing repetitive tasks on a performance measured system.

**Skills Applied:** Independent work, strong work ethic and commitment, hard work working with detail and without errors

---

**Virtek Visions (coop)**

**January 2011 to June 2011**

**Title:** IT Manager

**Description:** Virtek makes high precision lasers for accuracy tracing and quality assurance.

**Responsibilities:** Imaging computers, organizing audits, employee assistance, generating sales reports, assorted IT tasks

**Technologies:** Excel, Batch scripts, C#, Apex

**Skills Applied:** Teamwork, Leadership roles, official business conduct

---

## **Education and Training**

- Computer Science (University of Waterloo)
- Business Administration (Wilfrid Laurier University)
- Specialized High Skills Major Secondary School Diploma (Computer Technology)
- Recipient of Arts award for leadership and excellence in physical education
- Developed solutions to coding challenges on Project Euler for personal enjoyment

## **Community Involvement and Interests**

- Founded HTML5 mobile app development team with two graduate developers, who then founded their own company developing apps (Unfortunately, due to school commitments, I could not continue)
- Volunteer and hockey participant - Waterloo Minor Hockey
- Former member of Bluevale Collegiate Institute programming team and competed in Dwrite Computing Contest
- Enthusiastic athlete (hockey, golf, snowboarding, tennis, ultimate frisbee, baseball, soccer, lacrosse)
